Experience

Associate Software Engineer, RecruitCRM – Remote, India

April 2024 – Present

- Engineered a library of 30+ reusable React components from scratch, bolstering application scalability and UI consistency across the RecruitCRM platform, leading to 40% less code duplication and fewer bugs.
- Improved API response times by up to 55% by introducing cross-entity search in the Deal module, leading to faster data retrieval and enhanced system performance.
- Streamlined job board integration by designing a scalable base service in Laravel for 10 free job boards, reducing implementation time for new feeds and improving long-term code reusability.
- Optimized development workflow and system modularity in a microservices architecture by applying Laravel service pattern best practices with Vue 2, Vue 3, Laravel, and Spring Boot—accelerating developer onboarding and reducing code duplication by 30%.

Intern, Tatvasoft – Ahmedabad, Gujarat

May 2023 – June 2023

- Refined user engagement by 25% by designing and deploying responsive, intuitive UI components using React.js, resulting in smoother navigation and enhanced usability for an interactive online bookstore.
- Improved frontend code maintainability by modularizing components and applying reusable logic patterns in React.js, reducing development time for future features by 30%.

Projects

Advanced Analytics

app.recruitcrm.io/v1/reports/advanced-analytics

- Designed and developed an Advanced Analytics module, enabling real-time data visualization and insights, improving user decision-making and reducing manual data analysis by 40%.
- Drove a \$100,000 boost in annual recurring revenue as measured by subscription growth and reduced churn, by enhancing customer workflows and embedding actionable analytics.

Placements and Invoicing

app.recruitcrm.io/v2/placements

- Spearheaded the development of placement and invoicing features using Vue 3 and Spring Boot; reduced manual operations by 50%, enabling candidate placement via web app, API, and automation workflows.
- Piloted the implementation of an in-app invoice generation feature using Vue 3 and Spring Boot; the feature reduced manual invoicing errors by 15% across 1,000+ accounts.

Onstore (E-commerce Website)

Github

- Constructed multi-category e-commerce site leveraging Next.js, TailwindCSS, Express.js, Node.js, and MongoDB; identified server bottlenecks, reducing page load times by 40% improving user experience.
- Integrated Razorpay payment gateway to enable secure online transactions, streamlining the checkout process and achieving a 99.9% successful payment completion rate.

Skills

Languages & Frameworks: C, C++, Java, JavaScript, TypeScript, SQL, Spring Boot, Vue.js, React.js, Node.js, Express.js, Next.js

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, Lambda, S3, RDS, Route53, CodeDeploy), Docker, CI/CD Pipelines (GitHub Actions, CodeBuild, CodeDeploy, CodePipeline)

Achievements

AWS Certified: Cloud Practitioner(CLF-C01)

Microsoft Certified: Azure Fundamentals(AZ-900)

Amazon ML Summer School: Selected Participant

Education

Charotar University Of Science and Technology – B.Tech in Computer Science

October 2020 - March 2024

Bright Junior Science College – Higher Secondary Education

August 2018 - March 2020
